

In addition to our school, the following schools are participating in the Erasmus Circular Economy project: LICEUL TEHNOLOGIC PETROL from Moreni (Romania) and SELÇUKLU ÖZTEKİNLER MESLEKİ VE TEKNİK ANADOLU LİSESİ from Konya (Turkey).

In the framework of the activities planned within the Erasmus Project 2022-2-RO01-KA210 -VET-000093783 with our partners; the week of 19-23 February we received the visit of two groups of students and teachers.

During their stay in our city we were able to share, with our partners, different recreational and work experiences.

In this document you can consult the activities developed during the stay.

The experience has been very enriching, both for our students and for the visiting students:

- Visit to Asociación Atiempo in the Los Ángeles neighbourhood.
- Visit to the Alhambra in Granada.
- Collaboration in the medicinal garden of our school, harvesting and watering, with our 4th ESO DICU students.
- Manufacture of soda soap and used oil in the Chemistry laboratories with our students of Laboratory Operations.
- Visit to La Alcazaba and Almeria Cathedral, together with our visitors from Germany.
- Collaboration in the preparation of Compost with students from the Chemistry and Environmental Health Training Cycle.
- Completion of the soap making process, cutting and packaging.
- Farewell dinner at the Almeria Centre.

We are grateful for the participation and collaboration of the teachers involved in the different activities.

We are already organizing the mobility to SELÇUKLU ÖZTEKİNLER MESLEKİ VE TEKNİK ANADOLU LİSESİ Educational Centre in Konya which is going to take place between 12th and 18th of May.
